

# DUOTACK 365

*High Bonding Adhesives for Insulation and Cover Boards*

## COMPATIBILITY

### Roof Decks and Substrates:

- Structural Concrete
- Gypsum
- Cementitious Wood Fiber
- Structural Concrete
- Lightweight Insulating Concrete
- Steel (min 22 gauge)
- Wood (Plywood or OSB)
- Smooth Surfaced BUR
- Smooth or Gravel Surfaced Modified Bitumen

### Insulation and Cover boards:

- Polystyrene
- Polyiso
- High Density Wood Fiber
- Gypsum Board
- Coated Stone Wool
- Perlite- min 3/4 inch
- Asphaltic Cover Board
- Cement Board

## DISCOVER THE 365 ADVANTAGE

- **Less temperature restrictions**– can be applied in temperatures as low as 14°F without conditioning. Giving this adhesive the widest application window on the market
- **Faster installation** – designed with productivity in mind, Insulation can be applied immediately in wet adhesive. DUOTACK 365 is extremely applicator friendly and much less labor intensive.
- **Greater coverage rates** - DUOTACK 365's unique chemistry achieves the same foam volume as the competition while using less product
- **Eliminates thermal bridging** - the use of fasteners creates enough thermal bridging that it can substantially reduce overall thermal performance of the building envelope
- **Excellent for sensitive populations** - DUOTACK 365 contains zero VOCs and is virtually odor for a safer. Reduced job site noise less disruption to building operation and it occupants.
- **Greater flexibility and fatigue resistance** - over time adhesives retain their flexibility and provide long-term thermal shock and resistance

# DUOTACK 365

## SIZES FOR EVERY TYPE OF JOB

### CARTRIDGE

SIZE (GALLONS)	QUANTITY (PER BOX)	QUANTITY (PER PALLET)	COVERAGE (SQ FT)
0.4 1.5 LITERS	4 CARTRIDGES	50 BOXES	600 PER BOX

### CUBITAINER

SIZE (GALLONS)	QUANTITY (PER PALLET)	(SQ FT)
10 5 GAL (A & B)	18 SETS	2,500 - 3,800 PER CUBITAINER SET

### MINI DRUM

SIZE (GALLON)	QUANTITY (PER PALLET)	COVERAGE (SQ FT)
30 15 GAL (A & B)	9 SETS	7,500-11,400 PER DRUM SET

### DRUM

SIZE (GALLON)	QUANTITY (PER PALLET)	COVERAGE (SQ FT)
100 50 GAL (A & B)	2 SETS	25,000-38,000 PER DRUM SET

\*All coverage rates are based on a consistent bead size of 1/2 - 3/4 inch wide ribbons on 12 inch on center spacing. Coverage rates are approximate and vary depending on surface roughness and absorption rate of the substrate.

## TOOLS TO GET THE JOB DONE

### BATTERY-POWERED APPLICATOR

- Easy to use, this battery-powered applicator can quickly cover small and medium surfaces.
- A kit includes an applicator, two batteries and a charger.

### PACE CART

- Ideal for covering large surfaces quickly, this applicator was improved to meet installers' needs.
- The trigger facilitates the operation by reducing the risk of obstruction, overheating, and air infiltration in the pump.
- The generator shelf eliminates constraints related to the use of extension cords.
