

# SOPRANATURE® TOUNDRA BOX

## MODULAR, PRE-VEGETATED SYSTEM

SOPRANATURE's TOUNDRA BOX combines all the necessary components of a green roofing system into one single pre-vegetated, modular tray. The TOUNDRA BOX can be easily installed on SOPRANATURE® green roofs, garden terraces, and plaza decks.

## BENEFITS AND FEATURES

- **Fast and Easy:** Suitable for both small and large surfaces, these lightweight, easy-to-carry trays can be easily assembled in minutes to create an instant green roof.
- **All-in-One-System:** The SOPRANATURE® Toundra Box is carefully engineered modular tray system that includes all the necessary layers for a complete green roof system. Featuring a drainage layer, filter fabric, growing medium and pre-grown plants grouped together into one singular component.
- **No Horticulture Expertise Required:** Each tray is pre-cultivated with a variety of sedum species to provide maximum color, texture and habitat features. Perennial or sedum mixes can be adapted to the local hardiness zone and climatic conditions.
- **Aesthetically pleasing:** The removable sides protect the plants during shipping. Once removed, the modules disappear under the cover of soil and plants which means no ugly container edges or grid lines.
- **Storm water Management:** The Toundra Box features deep reservoirs and built-in channels to provide increased water capacity for plant usage while allowing excess water to drain freely.

## INSTALLATION INSTRUCTIONS

1

### INSTALLING THE TOUNDRA BOX

Place the Toundra Boxes next to each other over a layer of loose laid root barrier.

2

### REMOVING THE BOX BELT

Once you have two rows of boxes installed, remove the first row's belt to obtain the roof's continuous coverage with plants.

3

### CUTTING THE TOUNDRA BOX

If it is necessary to cut any of the boxes, preferably use a circular saw.

4

### WATERING

Water the plants copiously once the Toundra Boxes are in place. The growing medium must be soaked thoroughly.

5

### MAINTENANCE

Water the plants during the hot summer months as necessary. See the SOPRANATURE® Maintenance Guide for further details.
