

# SENTINEL<sup>®</sup> PVC PROFILE BAR

Extruded, pliable PVC bars

## DESCRIPTION

SENTINEL<sup>®</sup> PVC Profile Bars are extruded, pliable PVC bars designed to provide PVC membrane with the appearance of a standing seam metal roof. They are available in white, copper and silver, special colors are also available. Each profile is 1.2 inches (31 cm) in height, 1.3 inches in width (1.8 cm). Each profile has a weld base of 1.35 inches (34 mm) to attach the bar to the membrane.

<b>P650</b> (White)	1.38	9.84	1.2	10	98
<b>P650-G</b> (Gray)					
<b>M650</b> (Copper Art)					
<b>M651</b> (Silver Art)					

\* All values shown are nominal and subject to normal manufacturing tolerances.

## APPLICATION

Installation of the SENTINEL<sup>®</sup> PVC Profile bar is done by hot air welding. The profile bar can be installed on both flat and curved surfaces, and can be applied on any slope. When installing the profile bar, tack weld the bar in place to ensure it is straight prior to heat welding the bar in place. Refer to Performance Roof Systems specifications and installation instructions for additional application guidelines.

## STORAGE & HANDLING

All materials must be stored in a clean, dry location and cover as necessary to protect from environmental damage such as extreme cold, heat or moisture. Monitor varying environmental conditions during storage, handling and application.
