

# SOPRANATURE<sup>®</sup> INSPECTION CHAMBER

Aluminum drain cover and protector

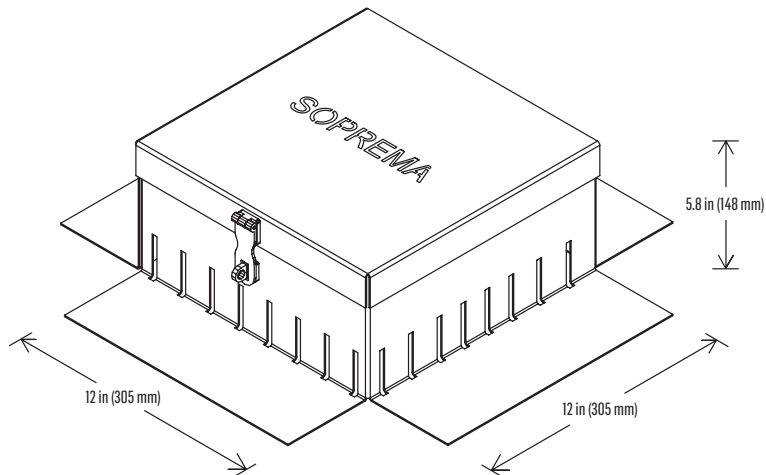

## DESCRIPTION

The SOPRANATURE INSPECTION CHAMBER is designed to fit over roof drains and protects drains from debris and particles that can impact regular operation. Manufactured from 16 ga aluminum, the chamber measures 12 in (305 mm) square and 5.8 in (148 mm) in height. Special order sizes are available. The door is equipped with a latch so it can be locked up if required.

## APPLICATION

Place the SOPRANATURE INSPECTION CHAMBER on the roof so as to cover the drain. Pour gravel around the drain while ensuring the flaps of the SOPRANATURE INSPECTION CHAMBER are properly covered, in order to hold the cage in place.

## DETAIL

## STORAGE & HANDLING

Store in a clean, dry location and cover as necessary to protect from environmental damage such as extreme cold, heat or moisture.
