

# SOPRANATURE<sup>®</sup> METAL EDGING

Aluminum edging system for vegetative roofing

## DESCRIPTION

SOPRANATURE METAL EDGING is a lightweight, durable aluminum edging designed to retain planting media, stones, pavers, and tiles in a vegetated roofing system. Multiple height options are available and can be ordered with a solid or slotted edge. Inside and outside corners are available for a complete assembly.

## ADVANTAGES

- ▶ Constructed from durable 16 ga (0.051 in) aluminum 5052-H32 with a mill finish
- ▶ Slotted edge designed to promote the flow of water

## APPLICATION

Install the SOPRANATURE METAL EDGING directly over the drainage boards, overlapping edges by 1 in (25 mm). Attach the edging pieces along the vertical face with a self-piercing stainless steel screw at a 1/2 in. For 10 and 12 in metal edging, material must have supporting screws on both sides, they cannot be free standing.

## STORAGE & HANDLING

Store product in a clean dry location and cover as necessary to protect from environmental damage. Ballast down during installation to prevent loss of product.

STANDARD

SLOTTED

## AVAILABLE SIZES

| PROPERTY                | VALUE               |
|-------------------------|---------------------|
| Height x width; in (mm) | 4 x 4 (100 x 100)   |
|                         | 6 x 6 (150 x 150)   |
|                         | 8 x 8 (200 x 200)   |
|                         | 10 x 10 (250 x 250) |
|                         | 12 x 12 (300 x 300) |
| Length; in (cm)         | 8 (2.4)             |
