

SQUEEGEE KITS

V-Notched Neoprene Blades for Permastic Application

ADVANTAGES

- ▶ Squeegees are a critical tool to achieve proper application rates for various PERMASTIC applications.
- ▶ Petroleum resistant neoprene blades with serrated edge for control of material deposit.
- ▶ Rubber blades allows flexibility of material thickness through pressure and angle applied.

APPLICATION

Membrane to insulation applications require the use of a $\frac{3}{8}$ inch V-notched squeegee to achieve the approximate coverage rate of 2 to 2.5 gallons per square.

Membrane to membrane applications require the use of a $\frac{1}{4}$ inch V-notched squeegee to achieve the approximate coverage rate of 1.5 to 2 gallons per square.

BLADE SIZES

KIT INCLUDES

- (2) $1\frac{1}{8}$ x 60 inch Handles
- (1) 16 in wide $\frac{1}{4}$ inch Head
- (1) 16 in wide $\frac{3}{8}$ inch Head
- (3) $\frac{1}{4}$ in Replacement Blades
- (3) $\frac{3}{8}$ in Replacement Blades
